

Kingspan Insulated Door Panels

UK and Irish News

Issue: April 2009

In association with

authorised UK door panel distributor

A year has passed since the last edition of Indupart's highly popular colour chart for Insulated, Sectional Door Panels.

Firstly we would like to advise that the technically superior Plastisol leather grain textured 200 micron finish has been re-branded as XL Forté™.

Partnership

Kingspan and Indupart have a long-standing and strong partnership which we believe is ultimately beneficial to you the door installer. Kingspan, as the market leader of insulated, sectional door panel in Europe, supply a high quality product on a competitive and timely basis to Indupart who manufacture and sell a wide range of sectional doors via strategically located depots at Stockport, Hemel Hempstead, Glasgow and Bristol (see overleaf for contact details).

Kingspan Panels

Our 40mm x 610mm insulated panels for sectional doors use a 'traditional joint' nose detail which is particularly suitable for wide door openings and are available in a range of 10 Kingspan XL Forté™ colours – the widest range of Plastisol colours in the market place. Please see colour chart overleaf. We are also pleased to offer the following industrial 610mm panels in the following finish options:

- Standard, stucco-embossed Polyester painted finishes in 13 colours.
- 80mm thick panel (typically for coldstore applications) in a White RAL 9010 Polyester outer finish.
- Aluminium Panel – plain, mill finish and stucco-embossed.

Traditional Door Panel

Height	Thickness	Joint Detail
500 mm	40 mm	Traditional
610 mm	40 mm	Traditional
610 mm	80 mm	Traditional
