Safety Assured

Performance

Maximum Dimensions: 4000mm x 3800mm

Frame: Guides and side brackets in PE, non-supporting

Covers: Motor covers in stainless steel 304, included as standard

Power Supply: 230 VAC, mono-phase

Control cabinet: Plastic, with IP65 protection degree

Safety: Barrel type inferred photocells

Installation: Easy installation due to factory semi-assembled frames and components

Temperature: Wide range operating temperature +2°C to +40°C

Humidity: Up to 80% condensation free)

Features

Hygiene and speed - two in one solution

Non rusting frame and food friendly

High level of sound and temperature insulation

Phase inverter for precision and speed

Pre-wired controls and cabling

Opening speed up to 2.5 m/s

Optional Extras

Fully Automatic Operation: High-speed door may automatically open when a radar or proximity sensor is triggered.

Automatic interlock: Both doors may be interlocked together, thus while one is working, the other is blocked for operation preventing double closing.

Wireless control without batteries: To minimise the number of run cables, a door may be equipped with wireless push buttons with unique "battery free" technology.

Curtain

Type: Completely flexible curtain, with self-relocating system.

Material: PVC as standard supply. Optionally in FDA approved PU.

Insulation: High-level acoustics and thermal insulation.

Colours: More than 15 colours available.

Curtain Repairs

We can repair all major brands of High Speed Doors. Patch repair and full curtain replacements are available at competitive prices at our off site facility.

Please note: For all curtain repairs a drawing will need to be supplied for us to get a close replica of the existing curtain.
